

Architectural Design Drawings - What you Will Receive

ABL Architecture is pleased to provide Architectural Design Drawings for any of the church building plans available through our web site at www.DigitalChurchPlans.com.

You are purchasing the very plans from which other churches were built; however, because of continuing changes, differences in building codes in different areas, and factors such as soil type and climate, *these plans will need to be revised and certified before they can be used for construction*. These plans are not for construction without the review and certification of a licensed architect.

Rather than design your church from scratch, you can save months of time and approximately half the cost of design by only paying for changes to a plan that basically already meets your needs.

Upon receipt of payment, we will email you the plans as listed below. These drawings may be modified by an architect of your choice or by our firm. These plans are sold as-is for one-time use only.

Digital File: AutoDesk® AutoCad format

1. Floor Plan
2. Four Exterior Wall Elevations
3. Door Schedules
4. Bathroom Details
5. Foundation Plan
6. Wall Type or Sections
7. UL Details
8. Code Summary
9. Building Section

Since most of our plans are for metal buildings, structural plans and details for steel structures are provided by the metal building company of your choice.

The following plans need to be provided by a local resource:

- Plumbing, mechanical & electrical
- Civil engineering

Please contact us to answer any questions or to discuss modifications.
